With Antenna Deal!
Bargain AM CB

An exceptional value AM CB that's now even better value - you get a special deal on a mobile antenna! Quality construction and reliability are built in. Intended for mobile use, it comes with mounting hardware and microphone. With optional power supply it can even be used as a base station.

Features:

- Compact (only 160 x 44 x 122mm)
- All 40 channels
- Maximum legal power
- Built-in noise limiter
- Digital channel readout & power/strength indicators
- Easy to operate

UNIQUE BASE

Swamper II

Here it is: the most significant advance in CB base station antennas you'll find around:

Exclusive capacitive top hat - highly efficient and attractive hat increases antenna efficiency - your signal gets further.

Exclusive commercial quality aluminium tubing with wind survival rating in excess of 130km/h. Extends to 5.4m.

Exclusive telescoping design allows instant erection or dismantling. Self-locking collars (similar to tripod locks) just turn and grip.

Exclusive full half wave design gives 3.75dB of gain without ground plane.

Exclusive pack supplies all antenna sections & hardware on single card complete with full instructions.

Exclusive base of antenna is at DC ground potential to minimise static and induced noise.

Exclusive bottom of antenna just slides over standard 1 1/4in TV mast. Complete with clamp.

EXCLUSIVE: One low price includes antenna, all instructions plus 50 feet of co-ax cable complete with PL-259 plugs! (Normally worth app. \$10.00 extra!)

Dick Smith UHF CB D1804 1982

Dick Smith Hornet II AM/SSB 1986

The function of this unit is to measure the output power of a CB transmitter and the matching conditions between transmitter and antenna. Simply to look at and functional, the unit comes complete with approximately 75 cm of coax ready connected with a standard PL-259 plug for direct coupling to the transmitter. There is also a standard 50 ohm power to adjust the antenna cable and PL-259 plug. Also included is a mounting bracket for installation in your vehicle, so that the meter may be left in circuit for constant monitoring. Measurements are easy with a single slide switch for Power/Forward/Reflected and a calibration control. A large easy to read meter gives direct SWR and Power readings.

Measuring Power: 120W full scale
Frequency Response: 27MHz (CB Band)
SWR Indication: 1.0:1 to infinity
Impedance: 50 ohms
Dimensions: 90mm x 60mm x 40mm
Weight: approximately 500 grams

No boat is too small!

**DICK SMITH
5 WATT/6 CHAN.**

- Full legal power
- Up to 6 channels
- Emergency frequency supplied.

DOC Approval No 242M161

Here's a transceiver offering the maximum legal power on the 27MHz marine band (5 watts) and a choice of up to six channels (unit is supplied with 27.88MHz already fitted). This transceiver offers you all the power of the fixed type, but you can take it home with you when you leave the boat. It operates on 12 volts from either batteries or your boat's power (it has a socket to take 12 volts input). A real work horse!

**THERE ARE
LEGITIMATE
USES, TOO!!!**

Our Pocketcoms have always been a big hit with kids: cops and robbers takes on a whole new meaning. James Bomb becomes DIT4 with one. But they're also ideal for business & other 'proper' uses too. Think about where short range communication is required. TV antenna installers use 'em by the boat load. They're found on construction sites. They're everywhere. Perhaps it's because they're less than ten bucks? Call D11101

UHF Power Amplifier

\$129

Now a power amplifier for UHF AMATEUR AND CB radio. A very healthy 20 watts output from virtually any UHF input from around 300MHz to 450MHz. And that could make the difference between being heard and not being heard. It's a power amplifier for UHF amateur transceiver, and its matching power supply. So now you can build a matching amplifier for Call 4-6314
