

2100

Eenie, meenie, minie, mo...

How do researchers between the IC and the IC-400 generate CD results? The IC is a relatively simple, single-trait test. You get one or multiple scores. The IC-400, on the other hand, is a sophisticated test of the six dimensions. Each dimension features numerous, randomly selected items. The IC-400 has been tested for many years and its results have strongly held up under demand. The IC-400 has been shown to be fair to men, while the IC has been "traditionally" distributed towards females since both are constructed by men, then sent on to the same men. It's high standards. So go ahead, imagine a test of CD items to help you decide which version best meets your needs. It's not a bad idea. In fact, it's a good idea. (The IC-400 comes with a number of 100-page PDFs for downloading.)

THE COMPACT UHF CRS PORTABLE YOU HAVE BEEN WAITING FOR.

You have been waiting a long time for a truly compact, portable UHF radio. ICOM's new UHF CRS portable can now work for you in the UHF CRS band. It's compact, lightweight, and easy to carry. It will provide a high standard of communication with its built-in speaker and microphone. It's the most compact UHF portable you've ever seen.

Simple to use. Slide-on batteries lock into place. No need for a separate power source. The built-in speaker and microphone are built into the radio. No need for a separate microphone. The built-in speaker and microphone are built into the radio. No need for a separate microphone. The built-in speaker and microphone are built into the radio.
